

AI-Powered Client Intake

neoLEGAL Intake

24/7 AI Client Intake System for Law Firms — Capture leads while you sleep. Wake up to qualified cases.

Smart 10-Step Intake

Conversational AI guides visitors through a complete intake: Name → Phone → Email → County → Charge → Arrest Date/Time → Location → Incident Details → Additional Info.

Florida Statute-Aware AI

The assistant references official Florida Statutes (DUI, criminal defense, traffic laws) and landmark case law during conversations — always with proper citations and disclaimers.

Lead Scoring & Status

Every lead gets a score. Hot leads are flagged instantly. Track status from New → Contacted → Qualified → Retained directly in the dashboard.

Real-Time Alerts

Get notified the moment a high-value lead completes intake. Email alerts go straight to your team. Optional SMS integration available.

Team Dashboard

Attorneys and staff log in to a real-time dashboard showing all leads, full intake details, notes, and conversation history — newest first.

Knowledge Base

Attorneys control what the AI knows. Add statute summaries, blog posts, FAQs, tone-of-voice guides, and case law. The AI uses it immediately.

How It Works

- 1. Visitor Arrives** A potential client lands on your website at 2 AM. Instead of a contact form, they see a friendly AI chat widget.
- 2. AI Collects Details** The chatbot asks structured questions and collects name, phone, email, county, charges, arrest info, incident description.
- 3. Lead Saved Instantly** All data is stored securely in your dashboard. The AI cites Florida law when relevant and adds the required disclaimer.
- 4. Attorney Follows Up** Your team gets an alert. You log in to see a complete intake summary with everything needed to evaluate the case.
